**Install New Above-ground Storage Tank near Building 36
PW-5269**

General:

This Contract pertains to the installation of a new AST. The location of the space for the AST is near building 36, Naval Research Laboratory, Washington, DC.

Scope of Work:

Provide all labor, material, equipment and tools necessary to construct the reinforced concrete pad near building 36, as shown in Drawing S-1.

Schedule of Work:

The Contractor shall provide all necessary labor, equipment, parts and supplies to:

- Excavate and remove approximately 25'-0"x 16'-0"x 2'-0" of soil for the concrete pad.
- Remove additional soil, if necessary, to match the level of the top of existing retaining wall.
- Place formwork, reinforcement and pour concrete as shown in the drawing.
- Compact the soil around the new foundation.
- Repair all cracks on the existing retaining wall. If necessary, remove deteriorated concrete and replace with new concrete

Start of Contract:

The Contractor shall notify the Contracting Officer in writing once all equipment, materials and tools are available and ready to be installed in accordance with this contract. The Government and the Contractor shall mutually agree upon a start date and the Contractor shall be given a minimum of seven days notice to begin work.

Material and Equipment Submittals:

Upon award of the contract, the Contractor shall provide manufacturer's materials, fabrication shop drawings and equipment specification bulletins and/or cut sheets pertaining to this contract work. The Contracting Officer's Technical Representative shall review the Contractor's materials and equipment specification data information for approval and/or disapproval.

Execution of Work:

The duration of this contract shall not exceed sixty (60) days from the start of work.

Utility Outage:

The Contractor shall be made aware that any type of utility (electrical, domestic water, natural gas, steam and steam condensate) outage that is required to accomplish any work pertaining to this contract, a minimum two week notice is standard policy at the Naval Research Laboratory. If the Contractor requires a utility outage, he/she shall submit this request in writing to the Contracting Officer's Representative. Under no circumstances shall the Contractor be allowed to secure any utility without written approval from Code 3500, Research and Development Services Division.

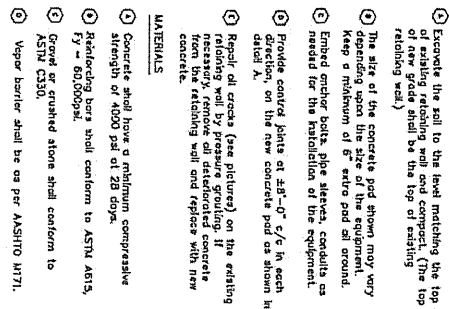

Safety:

The Contractor shall conform to Federal, State and local safety laws, rules and regulations, to include complying with 29 CFR 1926, and EM 385-1-1, US Army Corps of Engineers Safety and Health Requirements Manual.

The contractor shall provide a competent person as site safety and health officer for hazards identified in the activity hazard analysis (AHA). This person shall have successfully completed 10 or 30 hours of the OSHA Construction Safety training course. This person shall identify existing and predictable hazards that are dangerous to personnel and have authorization to take prompt corrective measures to eliminate them.

Safety training requirements for the site safety and health officer and competent persons are provided in the EM 385-1-1. A Safety Plan must include a site- specific accident prevention plan and an activity hazard analysis (AHA).

The contractor shall submit an accident prevention plan including AHA for government review and approval. The Contractor shall provide a qualified person who by possession of a recognized degree, certificate, professional standing, knowledge, training or experience has successfully demonstrated his or her ability to solve or resolve problems related to the work or the project. The Safety Office will determine the 10 or 30 hour class based on the complexity of the construction.
